

# components list of IMS-85 explode diagram

| components name                              |
|----------------------------------------------|
| 1 S60 top cover plate                        |
| 2 S60 ice outlet cover plate                 |
| 3 S50 ice outlet decorate plate              |
| 4 lights PCB                                 |
| 5 M25A up-side front plate                   |
| 6 M25 middle cover plate                     |
| 7 power switch                               |
| 8 lights stick paper                         |
| 9 M25A pipe for ice full sensor              |
| 10 ice full sensor fixedblock                |
| 11 ice full sensor                           |
| 12 M25 stainless steel slide door            |
| 12-8 M25 plastic slide door ( optional )     |
| 13 middle size ice spoon                     |
| 14 M25A down-side plate                      |
| 15 M25A plastic cabinet                      |
| 16 M25 cabinet front mounting plate          |
| 17 M25A right plate                          |
| 18 M25A cabinet foam insulate                |
| 19 condenser temperature sensor L1200        |
| 20 710UF50 condenser                         |
| 21 fan motor 15050B2HL                       |
| 22 M25A base plate                           |
| 23 compressor QD110HG                        |
| 24 feet M8                                   |
| 25 copper 3-way connector                    |
| 26 copper filter                             |
| 27 coil of electric valve 220/50/60HZ        |
| 28 body of electric valve F-2.0              |
| 29 capillary S30                             |
| 30 Accumulator 130-62                        |
| 31 bellows pipe 14-14-300                    |
| 32 3-way drain pipe connector                |
| 33 bellows pipe 14-14-300                    |
| 34 connector with inner screw 1/4"           |
| 35 water inlet connector with out screw 3/4" |
| 36 rear ventilate fence M25A                 |
| 37 water valve mounting plate S30            |
| 38 cable inlet tight clip                    |
| 39 drain pipe 14-1500                        |
| 40 water inlet pipe 3/4"-1500                |
| 41 silic gel pipe 9-560                      |
| 42 water drain connetor                      |
| 43 nut of drain connector                    |
| 44 T shape silica block                      |
| 45 head nut of drainage connector            |
| 46 power cable and plug                      |
| 47 rear cover plate M25                      |
| 48 drain connector of cabinet                |
| 49 silic gel gasket 28-38-2                  |
| 50 nut of drain connector of cabinet         |
| 51 water inlet pipe PE 1/4"-850              |
| 52 M26 cabinet back mounting plate           |
| 53 cable fixed clip                          |
| 54 M25A left plate                           |
| 55 M25A water collector                      |
| 56 fan motor 12038B2HL                       |
| 57 cover of PCB box                          |
| 58 box of PCB                                |
| 59 PCB control                               |
| 60 reduction gearbox RV030-20                |
| 61 flake motor 51K60GN-CFP                   |
| 62 60W flake motor support                   |
| 63 Middle mounting shaft S60                 |
| 64 water temperature sensor                  |
| 65 silica gel spray pipe                     |
| 66 tow-way connector PP-12-50                |
| 67 water float switch                        |
| 68 float water inlet valve                   |
| 69 water tank                                |
| 70 cover of water tank                       |
| 71 assemble flake evaporator FE60            |
| 72 copper shaft sleeve 10-35                 |
| 73 stainless steel bolt M8X68                |
| 74 copper shaft sleeve 10-25                 |
| 75 stainless steel washer M8                 |
| 76 stainless steel nut M8                    |
| 77 fan motor mounting support FS12038        |
